

## EuroFlex Max Metal

Our most versatile and best-selling line of heat transfer vinyl is **EuroFlex® Max**.

The PU vinyl material offers the possibility to cut fine and detailed designs and is extremely easy to weed.

With the simplest heat application, EuroFlex® Max will reduce production time in half.

A wide variety of colors allows you versatility and create the most incredible designs.

Enhance the results with EuroFlex® Neon or Euro Flex® Metal colors.

EuroFlex® Max has great color fastness and will retain its vibrancy even after multiple washes.

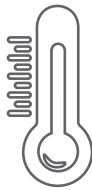

Euroflex® Max allows you to diversify your designs by layering several colors on top of each other.

Almost no limits when using Euroflex® Max, EuroFlex® Neon and EuroFlex® Metal vinyls.
